SUMMARY

Computer Science undergraduate specializing in AI & ML, with hands-on full-stack development experience. Seeking a Software Engineering role to build and ship real-world applications.

EXPERIENCE

ACT Global India Pvt. Ltd. — *Software Engineering Intern* Jan 2026 – Mar 2026

- Developed and maintained full-stack web features using React.js and Django REST Framework, working across the stack from UI components to REST API endpoints.
- Collaborated with cross-functional engineering teams to integrate AI-assisted tools into existing development workflows, contributing to production-facing web applications.

Edunet Foundation (AICTE) — *AI Intern, Transformative Learning Program* Dec 2024 – Jan 2025

- Built a real-time human pose detection system for posture analysis using OpenPose, applying computer vision techniques to a practical health-tech use case.

PROJECTS

AI Student Assistance Website | Flask, PostgreSQL *Team Project*

- Built a full-stack student productivity platform using Flask and PostgreSQL, unifying a Pomodoro timer, to-do list, calendar integration, and an AI-powered flashcard generator into a single dashboard.
- Designed the relational database schema and RESTful APIs powering the platform's core features.

Human Pose Estimation Using Machine Learning | Python, OpenPose *Independent Project*

- Implemented a real-time pose estimation pipeline using the OpenPose CNN architecture to process live video and detect posture in real time.
- Applied computer vision and deep learning techniques to convert model output into actionable posture feedback.

SafeWalk – AI-Powered Fall Detection Web App | React, TypeScript *Hackathon Project, 2025*

- Engineered a browser-based, camera-only fall detection system for real-time monitoring, removing the need for wearable hardware.
- Built a responsive web app with real-time video processing; secured 3rd place among 200+ teams at CodeVerse Hackathon 2025.

EDUCATION

VIT Bhopal University — B.Tech, Computer Science (AI & ML), CGPA: 8.97 *Expected May 2027*

School Of Excellence, Dwarka Sec-22, New Delhi (CBSE) — 12th Standard, 88.6% *2023*

School Of Excellence, Dwarka Sec-22, New Delhi (CBSE) — 10th Standard, 90.0% *2021*

SKILLS

Languages: Python, C++, JavaScript, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Django REST Framework, Flask

Tools & Concepts: PostgreSQL, REST APIs, Git/GitHub, Data Structures & Algorithms

EXTRACURRICULARS

- Secured 3rd place at CodeVerse Hackathon 2025 (SafeWalk), ranking in the top 3 among 200+ teams.
- Core Member, Design Team — Vitera Club & Anterix Club (2024–2025).
